Erdős, Paul

On the distribution function of additive functions. (In English)

Ann. of Math., II. Ser. 47, 1-20 (1946).

The author extends his previous work on the distribution of values of additive arithmetical functions (this Zbl 018.29301; Zbl 022.00903 and Zbl 022.01001). Many striking results are obtained.

P. T. Bateman
