Erdős, Paul

On some aspects of my work with Gabriel Dirac. (In English)

Graph theory in memory of G. A. Dirac, Pap. Meet., Sandbjerg/Den. 1985, Ann. Discrete Math. 41, 111-116 (1989).

[For the entire collection see Zbl 656.00008.]

Their joint work started in 1949. Dirac was working on chromatic graphs, and the author was interested in extremal problems. Several results and problems from discrete mathematics were raised and solved by their joint work. The paper ends with a list of 16 references, the earliest being in 1951.
