Erratum to: J Algebr Comb (2002) 16: 43–69
DOI [10.1023/A:1020882414534](https://doi.org/10.1023/A:1020882414534)

Theorem 12 of our paper “Transitive permutation groups of prime-squared degree” [Journal of Algebraic Combinatorics **16** (2002), no. 1, 43–69] is incorrect. For an accurate description of the codes invariant under a subgroup of $\text{P}\Gamma\text{L}(d, q)$, see Proposition 1.4, Theorem 1.5, and Sect. 3 of [J.D. Dixon and A.E. Zalesski, Finite imprimitive linear groups of prime degree, Journal of Algebra **276** (2004), no. 1, 340–370]. Corollary 3.8 of that paper tells us every $\text{PSL}(d, q)$ -invariant code is also $\text{P}\Gamma\text{L}(d, q)$ -invariant, which is not what our Theorem 12 would indicate.

We thank Primož Potočnik for both pointing out our error and explaining where to find the correct result in the literature.
